

# DB *Inventor* 2007

*Inventor*<sup>®</sup>

Document & Project Management

**EXPERIENCE**  
**MAKES**  
**THE DIFFERENCE**

For over 7 years, MechWorks has focused solely on the development of DBInventor, a widely used and established PDM system for Inventor<sup>®</sup>. Our goal continues to be the best in class in our industry and to provide the highest value to our customers. For MechWorks, customer satisfaction is the highest priority and MechWorks is committed to delivering the most highly qualified support in the PDM business.

DBInventor 2007 maintains the highest level of Inventor<sup>®</sup> integration. DBInventor takes advantage of all functionality including Inventor<sup>®</sup> complex document dependencies. With its full integration into both the Inventor Task Pane and Feature Manager, DBInventor provides a uniquely powerful PDM environment while maintaining Inventor ease of use. DBInventor 100% compatible with all Inventor releases 11 and 2008.

## DBInventor Express

**DBInventor Express** is ideal for small Inventor workgroups where user flexibility is the main objective. Features :

**DBInventor API**  
**Material Wizard**  
**Cutlist management**  
**Previous revision multiple visualization**  
**Title block management**  
**Category Maker**  
**Autonumbering**  
**Assembly duplication/rename Wizard**  
**AutoCAD 200x integration**  
**Word & Excel integration**  
**Html Output**  
**Edrawing Preview**

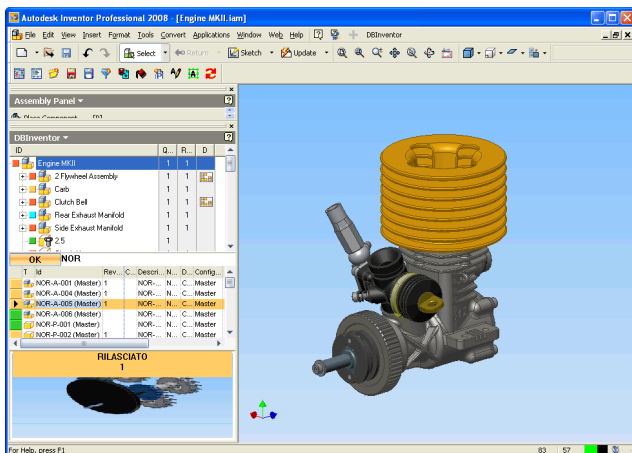

**Revision Control**  
**Batch plotting**  
**Drawing/Part-Assembly link mode**  
**DBWFilter enhanced search tool**  
**DBWServer file security service**  
**Configuration management**  
**User defined component quantities**  
**Fake components**  
**Customizable BOM generator**  
**Standard Parts support**  
**Local checkout mode**

## Secure document revisions

DBInventor protects your design files with standard OS file security offering the highest performance in checkin/checkout operations ( as much as 10x respect to vault based solutions ). Activate , view and compare previous revisions as needed, including BOM's.

## Integration at it's best

The **DBInventor feature manager and Task Pane** include the wild search tool , giving access to the DBInventor database for easy search and placement of assembly or drawing components .

## DBInventor Enterprise

**DBInventor Enterprise** offers the solution to all your data management needs. All DBInventor Express features plus:

**DBInventor Briefcase**      **User rights manager**

**Project assignment management**      **Integrated Workflow module with graphical process designer**

**Operating system or DBInventor authentication**      **Released database mode**

**Master Drawing Mode**      **Multi-site Geographically distributed DBInventor sites with database and file**

**DBInventor internal email notification system**

## DBInventor DBWerp module

**DBWerp** offers interface integration with an external ERP. This module enables specific visual clues in the interface and adds commands to manage materials, documents and Bill Of Materials. The web service architecture allows remote interaction

## DBInventor Web Client

With the **DBInventor Web Client** you can publish your database and documents on the web and share them with your business partners. User access and functionality is controlled at the group level by the DBInventor User Rights Manager.

## DBInventor StandAlone versions

DBInventor Standalone provides non-Inventor users (purchasing department, shop floor etc.) a cost-effective access to the DBInventor database . The users can participate in the design process, view documents and prepare BOM's or other outputs needed for their department .
