

All the data in the right place.

DBClaim connects the MechWorks pdm technology inside of SpaceClaim.

DBClaim is designed on the proven SpaceClaim® philosophy: easy, quick and effective for any user to manage his technical data.

DBClaim pdm is developed by Expace Italia.

MechWorks PDM is the document management solution for: SolidWorks®, Autodesk Inventor®, Siemens SolidEdge®, SpaceClaim®, AutoCAD® and ME10.

DBClaim includes:

- Automatic tools coding;
- Custom properties management;
- Revision cycle management;
- Properties file searching and filtering directly from SpaceClaim® user interface;
- Opening or inserting codes in assemblies with a simple double click;
- External components management;
- Automatic insert full assembly structures in the PDM archive;
- Documents are organized and managed in the Project tree;
- Advanced searching tools;
- File previews (SpaceClaim, Word, Excel, AutoCAD, SolidWorks, Inventor);
- Workflow customization and management;
- BOMs configuration and export;
- BOMs virtual components management capability;
- Exporting Excel BOMs management;
- Microsoft® Office and AutoCAD integration;
- Generic file management;
- Support distributed sites with DB and/or file replication;
- The Briefcase technology allows you to share projects in multisite companies;
- Automatic exporting DXF/DWG file of the sheetmetal flattened parts from a SpaceClaim assembly;
- Printing management of the assembly drawings.
